Quality • Service • Commitment

# Commitment ...

We're your partner, not your competitor

## Huge inventory of MHT motors

Hydraulic Parts Source has one of the best inventory levels of Vickers MHT motors that are obsolete from the OEM. We stock all sizes, from an MHT 32 through MHT 1000. Motors are dynamically tested on one of our Schroeder test stands.

Hydraulic Parts Source is committed to developing long-term partnerships with our customers. You won't find us soliciting your business, while at the same time soliciting your end user customer. With our commitment to serving only the hydraulic sales and service industry, your customer's identity is safe with us. We offer a true blind drop ship option. We'll ship your order directly to your customer, with your name as the shipper, and absolutely no evidence that the package came from us. We are a company based on integrity, value and trust.

## Having what you need, when you need it

At Hydraulic Parts Source, we stock individual parts, sub-assemblies (including cartridge kits and rotating groups), and complete units available for immediate shipment. All in all, there are over 1 million parts that can be quickly

assembled into the exact model you need. The niche that we provide to you, our customer, is having the product when you need it, and shipping it on time, every time.

## Having a quality product you can rely on

We strictly adhere to all assembly procedures and specifications outlined by the OEM. All parts and units are completely evaluated and double-checked to the model code that is ordered before shipping.

We make sure each unit that we remanufacture is tested to 100% of the OEM specifications. We provide complete test reports upon request on every unit we ship. We're so confident of our quality, we cover all the items we sell with a one-year warranty.

# Remanufacturing ... looks like NEW

All of our remanufactured parts must exceed our in-house standards as well as OEM specifications. Our highly skilled technicians use a wide range of equipment - from lapping machines to CNC milling machines, and from surface grinders to lathes - to guarantee the quality you demand. Below is a partial list of some of our machinery used for remanufacturing:

- Hot pressure washers
- Ultrasonic cleaner
- Thermal Cleaning System
- Profile grinder
- Surface grinder
- Platen grinder
- CNC Mill
- CNC Lathe
- Lapping machine

The REMAN advantage over NEW Hydraulic Parts Source offers three distinct advantages over new products. First, there's significant savings, due to our lower prices. We can save you up to 75% off the cost of new equipment. Second, our remanufactured and replacement items are readily available. There are no long and unpredictable lead times. On most standard orders we can ship the same day. Third, we are able to supply many items that the OEM has made obsolete and no longer provides.

# Hydraulic Parts Source

Quality • Service • Commitment

Hydraulic Parts Source was established in 1996 with a clear vision of exclusively serving the hydraulic sales and service industry. Located in Harrison Township, Michigan, Hydraulic Parts Source is a premier supplier of Vickers, Racine and Denison remanufactured components and replacement parts. Our experienced personnel, state of the art equipment, and ongoing commitment to improvement result in remanufactured components of the highest quality. We look forward to showing you first hand the Hydraulic Parts Source difference.

## Customer Service...

With your initial call ...  
With one call to our knowledgeable customer service department, you'll get an instant price and availability quote that will allow you to quote your customer immediately and get the order. All of our Customer Service Representatives are trained in all facets of our organization. Their familiarity allows them to provide a level of service unsurpassed in the industry. Their technical expertise will assist you in determining the specific parts or units you need. Our computerized quote and order entry system provides you with instant price and delivery quotes and real time status of your order. You automatically receive a hard copy fax of your quote within minutes of your request.
